SURFACE CARE IN KENYA -CATEGORY ANALYSIS

HEADLINES

- In 2010 surface care increases by 9% in current value terms to reach KES6 million
- The threat of communicable diseases drives growth in surface care in 2010
- Window/glass cleaners records the fastest current value growth in 2010, increasing by 17%
- Unit prices rise across the board in 2010, driven by inflationary and economic factors
- Unilever Kenya leads surface care with a 43% value share in 2010
- Surface care is expected to see a CAGR of 2% in constant value terms over the forecast five years

TRENDS

- The constant threat of the spread of communicable diseases has been a constant theme and a driver of growth in the category. The contribution of products in this category towards general hygiene, thus reducing the chances of contracting communicable diseases, was a major driver of growth in 2010.
- Window/glass cleaners recorded the fastest current value growth in 2010, as it was particularly hit by price rises related to the cost of raw materials. These products also had growing appeal for upper-income households, which see it as a more sophisticated product, and also institutions.
- Bleach brands such as Jik are common alternative products which can be used for surface care in Kenya. Once again, price is the main reason for this trend, and bleach can be used for more household tasks than surface care products. In fact, consumers are only willing to pay for more sophisticated products if they serve more than one purpose, and thus cut costs.
- Surface care products in powder format accounted for most sales in 2010, since they are cheaper than liquids and gels.

COMPETITIVE LANDSCAPE

• Unilever Kenya led surface care in 2010 with a 43% value share. This is due to a well-developed portfolio of brands, led by Cif, which are preferred by consumers as they are good value for money. The Unilever marketing and distribution behemoth, which covers the entire country, also contributed to this good performance and value share.

PROSPECTS

Surface care is expected to perform relatively well in the forecast period, recording a constant value CAGR of 2%. The constant threat of communicable diseases due to poor hygiene is expected to be a major driver of growth.

SURFACE CARE IN KENYA COMPANY PROFILES

HACO INDUSTRIES KENYA LTD IN HOME CARE (KENYA)

Strategic Direction

Haco Industries Kenya, just like other players in the market, will continue to focus on innovation during the forecast period, as a way of increasing ITS share of sales. Its international linkages with multinationals such as Dax Cosmetics and Alberto-Culver, as well as a recent 51% buyout by Tiger Brands of South Africa, remain a strategic priority, with these companies having large research and development budgets. In addition, the company will continue to support its range with good advertising support during the forecast period. The company has rebranded to Haco Tiger Brands.

Company Background

- ~ Haco Industries Kenya Ltd is a locally-owned private limited company, and was established in 1974. It employed 500 staff in 2010.
- ~ The company's core business areas include stationery, shavers, beauty and personal care and home care. The company diversified into beauty and personal care and home care in the mid-1990s.
- ~ The company has nationwide distribution across Kenya, and is particularly strong in supermarkets! hypermarkets and parapharmacies!drugslores.
- ~ In 2011 the company rebranded to Haco Tiger Brands from Haco Industries, after a 51% buyout by Tiger Brands of South Africa in 2008.

Production

- ~ Haco Industries Kenya primarily relies on its own domestic production facilities.
- ~ The company is a manufacturing and distribution partner for several international producers, including Alberto-Culver, Imperial Dax and ET Browne Co of the US, Societe BIC of France and Jeyes Pic of the UK.
- ~ The company has a distribution reach of over 180 million people in the greater Eastern Africa area, with its export sales including Uganda, Tanzania, Ethiopia, Rwanda, Burundi, Ü bouti and Eritrea.
- ~ The company's production facilities adhere to Good Manufacturing Practices guidelines, and meet the Kenya Standards set by KEBS (Kenya Bureau of Standards).
- ~ With the new joint venture with Tiger Brands, the company will benefit from international best practice and growth, and will also see many international brands join its stable.

Competitive Positioning

- ~ The company benefits from offering a wide range of prices. It offers high-margin products targeting middle- and high-income consumers, as well as high-volume lower-priced products targeting low- and middle-income consumers. Consequently, the company's growth is expected to be sustainable in the long term, and should not be strongly impacted by economic fluctuations.
- ~ The company offers a wide product range, and is typically a leader in terms of innovation. This is partly due to it representing multinationals and their brands, with these companies generally investing heavily in research and development. The company's representation of international brands such as ET Browne Drug Co's Palmer's brand and Dax Cosmetics's Dax brand offers it a strong advantage.
- ~ Further international brands from Tiger Brands, such as All Gold, Colmans, Beacon and others will boost the company's ratings and profile.

HOME CARE IN KENYA - INDUSTRY OVERVIEW

EXECUTIVE SUMMARY

Growing Middle-class Will Be the Driver of Future Growth

As the country's economy slowly recovered from recession and political turmoil, the middle-class regained some strength, and is set to be the engine of growth and indicator of economic prosperity in the coming years. Coming from a time when there was huge income disparity – the gap between the rich and the poor in Kenya has traditionally been amongst the highest in the world – the rise of the middle-classes is likely to bode well for the economy. This is a country where more than 50% of the population lives below the UN threshold of poverty (less than USD1 a day, and more than 75% lives on less than USD2 a day. At the same time it has some of the wealthiest men and women on the continent – Nairobi is rumoured to be the city which has the third largest population of Mercedes Benz cars in the world. The growth of the middle-classes will definitely boost business and the overall economy in the near future.

Rebounding Kenyan Economy

The Kenyan economy is on the rebound from the major shocks in 2008 and 2009. The effects of the post-election violence were far-reaching, with tourism, the country's leading source of foreign exchange, taking a direct hit due to adverse travel advice. This situation changed in 2010, and it is predicted that 2011 will be the best year yet for tourism in Kenya. Also, with the global economy largely on the rebound, and the country by and large shielded from the European debt crisis in most ways, except for tourism (the UK is Kenya's leading source of tourists – 16% in 2010); the economy is in better shape than it was 2-3 years ago.

Soaring Cost of Living Due To Economic Factors

The cost of living is rising, driven by the weakening shilling. The shilling has, since Q12011, lost over 20% of its value against the world majors. This loss affected the country, which is a net importer and depends largely on foreign currency. The currency shock impacted the price of fuel locally, which was at a record KES117 per litre in September, the highest it has ever been, and this has a far-reaching impact on the cost of production, transport, manufacturing and everyday life. Recent drought conditions also led to an increase in the cost of electricity, since over 85% of the country's electricity is hydro-produced; in some cases prices rose to three times the normal cost. This made the cost of living very expensive in Kenya, and many products (especially food) saw prices increase, in some cases by margins as high as 30%.

the 2012 Election Will Shape the Economy in the Coming Years

2012 is an election year, and is particularly significant because it is the first under the new constitution, promulgated in August 2010. The new constitution has completely changed the political landscape, with new positions created and the governance structure shaken up considerably. Also, the current president, Mwai Kibaki, is constitutionally required to step down, having served two terms. The transition of power in the new dispensation is unprecedented, and it is yet to be seen how it will play out. Memories of 2008 are still fresh in people's minds, and the world will be watching keenly to see how 2012-2013 unfolds.

Increased Company Activity Expected

There has been some significant activity in the home care market, with a few notable mergers. In particular, manufacturing giant Haco Industries Kenya was bought out by Tiger Brands of South Africa to create the mammoth company Haco Tiger Brands. This is likely to be a significant player in the market, with several international brands in its stable. It is yet to be seen how this will play out. Also, there have been forays by new products in the market, such as Bolt Insecticide, Ariel laundry detergent and a new variant of Sunlight, launched in 2011. All this activity points to growing investor confidence in the home care market, and increased scope for growth.
